I have shorten the slide #26 and deleted slide #27. I can present slide #26.  
Could Tom or Pete to present #36 for management consideration?  
Thanks.  
Yung

Hi, Pete and Tom,  
I agree that the slide 26 and 27 can be combined. I will shorten the cancer classification.  
I can present slide 26 and 27. Pete can present slide 37 for management.  
Is that OK with everyone for this run through?  
Yung

Whatever you guys want to do and agree with is fine by me. Just let me know so I can cover Tom's part on the run-through meeting on the 19<sup>th</sup>.

Pete

Slide 27 is a continuation of 26 with only the final bullet different in that it provides the risk estimates and think Yung

## Ex. 5 Deliberative Process (DP)

Okay, I went through the slides and then the way I see it, Yung you will present slide 26, and Tom will present slides 27 & 37.

Pete

The "Human Health Risk Picture" slide is 90% tox and I thought it would be better for Yung to present. I can present the HED portion of the "Management Considerations" slide.

Hi Tom,

I have no problem with you attending the ROCKS meeting. I completely understand. However, I think there is one slide on human health aspects of broflanilide tagged for HED to present. The way I have always seen this handled is that the risk assessor gives the presentation at these briefings. I will cover this for you and the branch at the run through but please handle this going forward.

Pete

Hi Pete – There is a ROCKS meeting at the same time as the slide run through. I have a few comments for ROCKS to discuss and think I should attend it rather than the slide run through – do you agree.

Tom

**Subject:** Slide run through for DD briefing (5/26) on PFAS considerations for PQZ and Broflanilide

Hi all,

The slides have been updated (content and format) based on our meeting last week. Division/branch leads have been added to each slide in the notes section. Please review and confirm the member/s of your team that will be covering each slide before we meet on Thursday 5/19. We are still missing our overall conclusion/recommendation and input is needed from the science teams. Please review the slides and remaining comments and fill in items where Debra and I have asked for input.

Thanks,  
Beth
